

RFP Questions			
#	Question	Answer	Date Posted
1	Should the financial model focus on estimating the costs of the program, or also estimate the sources of funding (e.g. existing funding sources for early learning like Step Ahead, ECEAP and Head Start programs)? The RFP states that “the Action Plan shall make recommendations on braiding, blending, and integrating existing federal, state, and local funding sources to the greatest extent possible.” Does the model need to estimate the specific existing funding amounts?	The Financial Model should estimate the program costs for the 2-4 options recommended by the Consultant. It should also estimate the forecasted revenue from existing funding sources for early learning that would offset program costs. This way, the Financial Model will be able to produce the funding requirement for the options presented.	11/7/2013
